

BEVERLEY BLINDS · HOW IT ALL WORKS

From your customer's window to your bank — one system.

Every order flows through on its own. Here's the whole journey, start to finish.

1

Beverley HQ

Every blind we sell — with all its options and today's prices — lives in one place, kept up to date by us.

2

Your trade customers 60+ ACCOUNTS

They see your full range and current prices automatically, and use it to quote their own customers. No more emailing out price lists — a price change reaches everyone at once.

3

They place the order

One click sends it straight to the Beverley factory. (If they'd rather buy a line from another supplier, they still can — their choice.)

4

The factory sorts every blind

The moment an order arrives, each blind is sent to the right place — automatically:

Roller blinds

to the roller bench

Vertical blinds

to the vertical bench

Pleated blinds

to the pleated bench

Anything we don't make

emailed to our supplier to order in — you approve before it sends

5

**Made & watched**

Each bench makes their blinds, and you watch the whole floor's progress from one screen — no walking round asking where things are.

6

**The money side**

Delivery notes, invoices and statements are done for you, and late payers are chased automatically. When money lands in the bank, it's matched to the right customer and sent to QuickBooks — never typed in twice.

The books always match the bank. Nothing goes to QuickBooks until it's actually been paid — so what's in the accounts is real money in, every time.

Beverley Blinds — the whole journey, one system.
